About Alliance Medical Centre

Alliance Medical Centre (AMC) provides comprehensive health screening packages and General Practitioner services to help you manage and take charge of your health. As a physician-led organisation, we understand the unique health needs of different ages, genders, and conditions. Hence, we offer a comprehensive range of health screening packages tailored to your needs. Our services encompass a wide range of in-clinic tests, including stress ECG treadmill testing, eye health examinations and cardiac health assessments.

Integrated with a General Practitioner clinic, we provide access to a suite of primary care services including the treatment of common acute illnesses and management of chronic conditions. Our dedicated team of in-house family physicians also provide personalised medical follow-ups and recommendations based on your detailed health screening results.

Together with our diagnostics arm, Alliance Radiology, we are equipped to offer additional radiology and medical imaging services such as digital x-rays, ultrasounds, mammography, and DEXA (Dual-Energy X-Ray Absorptiometry), all in one convenient location.

Alliance Medical Centre & Alliance Radiology are wholly-owned subsidiaries of Alliance Healthcare Group (AHG) – an integrated healthcare service provider and partner delivering a connected ecosystem of care for the Singapore community.
